[Reservation Manager](#)

Manage your rental units and properties simply and effectively. Reservation Manager allows you to easily list details of your hotel, B&B, holiday cottage, villa, gite or other type of accommodation you are offering. Reservation Manager can present this information in a user friendly format to your website visitors. Reservation Manager does not only display the advertisement for your property, it also allows website visitors to view reserved dates of each property/room with a comprehensive availability calendar ultimately allowing them to place their own, online reservations, then secure their reservation by paying using the integrated PayPal functionality.
